What makes us different

ONE Integration

- Complete integration in over 40 ERP & shop systems or via API
- Plug & Play with our own Windows software from day one
- Individual shipping setup with our Onboarding-Team

ONE Label

- One label standard for all countries and products (letter, parcel, return)
- Optional classification of each individual shipment according to geo-data
- No pre-sorting by the dispatch warehouse necessary

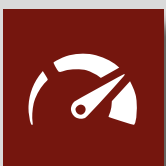

ONE Tracking

- Continuous tracking from First Label up to delivery
- Link to the tracking page of the last mile carrier
- Transparent tracking in the recipient's national language

ONE Cont(r)act

- One interface to all carriers
- Processing of all clarification cases from one source within 24 hours
- Only one invoice for all carriers and products

- Swift and uncomplicated test phase
- Add-on services that are only offered by the service provider in the country of destination
- Real, client-specific shipping solutions
- Attractive shipping conditions starting from one parcel
- Self-injection or customized pick-up coordination

Not familiar with the **needs and wants** of your international recipients?

Use our **know-how** and benefit from our **routing**.

You require **individual delivery** options for your customers that only local service provider offer?

Ask us about the **individual setting options** when selecting the final delivery partner and their **delivery options**.

Are you reluctant to **commit to a contract**?

Arrange a **test phase** before you decide.

You want **attractive prices**, but don't have any quantities yet?

Benefit from our low shipping rates right **from the first shipment**.

You also need a solution for your **product world** for small items or consignments with a low value of goods?

Maybe our **Eco- or Letter category** national/international will suit you.

You don't want to sacrifice your internal processes and still have an **individual shipping setup**?

We understand that. That's why we are happy to adapt our **processes**.

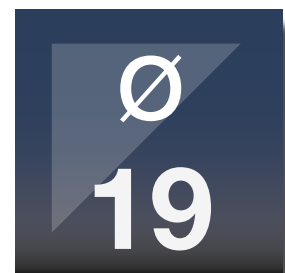

In 2023, we delivered letters and parcels for our customers to **143 countries/regions**.

The front-runner among our customers and thus 'Cross-Border Champion 2023', sent to **92 countries** alone. Since our foundation and records, we have thus sent to **194 countries / regions**.

Did you know?
On average, our customers send their goods to **19 countries**.

PARCEL.ONE #CrossBorder 2023 in Numbers

PARCEL.ONE, founded in 2017, is a global logistics provider specialising in cross-border shipping of B2C and D2C Letter and Parcel shipments.

At the German location in Pohlheim, shipments and returns from 1,000+ EU and non-EU shippers are processed on 14,000 sqm.

For each individual consignment, the best possible combination of over 480,000+ shipping combinations is selected after the geodata has been recorded. The optimal delivery service provider is determined from 45+ connected last mile carriers or networks and the consignment is handed over to them. The organisational effort for shippers, brands and manufacturers is significantly reduced when it comes to the best possible service for the recipient in the respective destination country. Why numerous software integrations, different carrier labels, own consignment sorting or direct injection into the various destination countries when it could also be simpler?

Next Level: One integration & One label for all options.

PARCEL.ONE simply reduces complexity, gives you more options and is, by the way, also ecological.
